PERSONAL PROJECTS

Advanced-React-CLI (06/2019 – Present) ↗
- A Command Line Interface developed by Dev Isle - a developer community I contribute to.
- Gives the user multiple choice options for starting a new React application with bundled packages and boiler plates.

CryptoClash - Dashboard (07/2019 – Present) ↗
- Uses CryptoCompare's api to fetch data for multiple cryptocurrencies.
- Also includes real time relevant news, polling, and messaging modules.

NFL Rosters (06/2019 – 06/2019) ↗
- Tech Used: React, JavaScript, Node.js, HTML/CSS, React-Dom, Semantic UI, API.
- All NFL player cards sorted by each team with a player search feature.

E-commerce clothing store (06/2019 – Present) ↗
- Tech Used: React, JavaScript, Firebase, Redux, GraphQL, React-Dom, React-Router, React persist, HTML/CSS/Sass, Reselect, Node.js, Stripe API.
- Full fledged e-commerce web app with sign in w/Google, stripe integration for payments, locally stored data for cart and checkout, and reusable components.

Face Detection App (05/2019 – 06/2019) ↗
- Tech Used: React, JavaScript, HTML/CSS, Clarifai API, PostgreSQL, Node.js, Express.
- Contains sign in and register, user entry counter, image url and upload submission form, and Clarifai's face detection api.

My Portfolio Website (06/2019 – Present) ↗
- Created my personal portfolio using React, JavaScript, Bootstrap, Jquery, HTML/CSS, and JSON.
- Used a JSON data file to make the React components reusable as a template.
- Added animations using translate3D in CSS.
